

Lake Brome Residence: a modern family home

Description

A place where the family can live comfortably immersed in the heart of the wilderness

October 7, 2021

Situated on the majestic lake in the Southern Eastern Townships, Lake Brome Residence was first inspired by a large, outdoor, covered terrace where the family could live immersed in nature. The single-level dwelling, designed with floor to ceiling windows, takes full advantage of the sweeping lakeside views and surrounding mountainous landscape.

With planning and execution taking place over more than a year, the Brome Lake residence has proven to be an inspiring and challenging project.

Kastella's mandate ranged from integrated millwork to custom furniture production. The Lake Brome Residence was an inspiring and demanding project that took over a year to plan and complete.

The design-savvy clients selected walnut with a water-based finish as the primary, interior material. The warm, caramel tones of the panelled walls and integrated case goods added depth and character to the new construction.

The highly functional kitchen included two strategically placed 10-foot islands that maximized the lakeside views while maintaining the welcoming nature of the home. The minimalist kitchen, designed with flat panelled walnut cabinetry, open shelving and black Fenix NTM countertops is reminiscent of Kastella's furniture.

'The single-storey house with full-height windows has an unobstructed view of the lake and the surrounding mountainous landscape.'

The seamless flow of panelled wood walls and built-ins extended past the main living space and into the powder room, mudroom and sleeping quarters. The master bedroom closets, as an example, served as the backdrop for their king-size B107 bed.

In addition to providing custom millwork and collection furniture, Kastella was tasked with designing an outdoor furniture series modelled after central pieces in their collection. A custom length version of the T107 dining table found a home in the covered outdoor eating area, as did an adaptation of their C110 bench.

“The Lake Brome residence was a great opportunity for the company to collaborate with Atelier Pierre Thibault, a firm which Kastella has always held in high regard” says **Jason Burhop**.

About Kastella

Kastella is a company of people dedicated to design, craftsmanship and local manufacturing. Founded in 2003 by Jason Burhop, the Montreal workshop specializes in the production of high-quality, solid wood furniture and custom architectural millwork. Through the years, Kastella has built a solid team of local craftspeople dedicated to creating beautiful, functional and timeless pieces of furniture.
